AI & COMPUTER VISION ENGINEER

SUMMARY OF QUALIFICATIONS

Artificial Intelligence and **Computer Vision Engineer**, undergraduate in Computer Engineering at UFSC. I lead technical innovation initiatives focused on the end-to-end development of **Deep Learning** and **Computer Vision** solutions. I have advanced experience in the orchestration, training, and fine-tuning of **neural networks (PyTorch, ConvNeXt, YOLO)**, building vector search architectures (Qdrant), and implementing systems based on **Large Language Models (LLMs)** with **RAG** architectures.

FORMAÇÃO ACADÊMICA E IDIOMAS

❖ **B.S. in Computer Engineering (in progress)** – Universidade Federal de Santa Catarina (UFSC) – Expected 2026.2

PROFESSIONAL EXPERIENCE

SEP/2025 – PRESENT GLOBAL DRONES
AI & COMPUTER VISION ENGINEER

- ✓ Technical and architectural **leadership** in complex **Artificial Intelligence** projects focused on large-scale infrastructure monitoring and precision biology.
- ✓ End-to-end development of web platforms and **Deep Learning** and **Computer Vision** pipelines, orchestrating the training of **deep neural networks (PyTorch, ConvNeXt, ArcFace)** and real-time **vector** search systems (**Qdrant**).
- ✓ Integration of data from varied sources (**GIS, LiDAR, and Drones**) for automated structural anomaly and terrain feature detection systems.

Key Results:

- ❖ **Led** the technical structuring of **AI** for the Bolivia-Brazil Gas Pipeline (TBG) smart inspection project, covering **2,593 km** across **5** Brazilian states.
- ❖ Orchestrated the development of a **computer vision** platform for cetacean **re-identification**, integrating visual alignment models (**YOLO**), **vector** searches, and a web interface (**Flask**).

SEP/2025 – MAY/2026 GLOBAL DRONES
BACKEND & AI INTERN

- ✓ Engineering backend architectures for high-volume processing, building APIs (**FastAPI**) and event-driven microservices (**Node.js, Python**) via asynchronous messaging (**Redis/BullMQ**).
- ✓ Development of spatial analytical engines in **Python (GeoPandas, Shapely)**, implementing complex geometry algorithms for precision agriculture systems.
- ✓ Creation of internal tools and automations for the engineering team using **Multi-Agent RAG** architecture and **Large Language Models (LLMs)**.
- ✓ Integration of external services, such as the **GitHub** API, into corporate consolidation processes and automated report generation.

Key Results:

- ❖ Designed and developed an automated Code Review bot from scratch that solved the team's main bottleneck, reducing the approval cycle by **65%** and saving **20 hours** per week for senior developers.
- ❖ Implemented an executive consolidation system that automated sprint summarization, returning **10 hours** per week of strategic focus to technical leaders.
- ❖ Built an advanced spatial algorithm for weed management, whose technical density resulted in the formal **submission** of a **scientific paper** to the SIBGRAPI conference.

JUN/2024 – JUL/2025 QUIZLET

CONTENT CREATOR (FREELANCE)

- ✓ Developed study materials and technical solutions in **Computer Science** and **Mathematics**, translating complex concepts into clear and accessible explanations.
- ✓ Created content and communicated with the team in **English**, improving my fluency in the language.
- ✓ Produced educational content that serves a base of **millions of global users**, directly contributing to the platform's mission of making technology education more accessible

HABILIDADES TÉCNICAS

- ❖ **Languages:** Python, TypeScript, JavaScript
- ❖ **IA & Machine Learning:** PyTorch, YOLO, Langchain, RAG
- ❖ **Backend:** Node.js, Express.js, Flask, FastAPI, Prisma (ORM)
- ❖ **Databases:** PostgreSQL, Redis, Vector Databases (ChromaDB, Qdrant)
- ❖ **Tools & Technologies:** Docker, Git, GitHub

INFORMAÇÕES EXTRACURRICULARES

- ✓ **Certificate of [Academic Performance](#)** | Universidade Federal de Santa Catarina (UFSC)
 - Recognized for academic excellence by achieving the maximum performance index (10.00) in the Computer Engineering course during the second semester of 2024.
